

**AMENDMENTS TO THE CLAIMS**

Claims 1-20 (Cancelled)

21. (Currently Amended) A method for enabling a wireless client device to communicate with at least one server having one or more applications residing thereon, ~~the method comprising the steps of:~~

enabling the wireless client device to select an application residing on the at least one server;

enabling the wireless client device to select at least one application action associated with the selected application residing on the at least one server;

executing the at least one selected application action on the at least one server, the application action comprising one or more of opening at least one file within the server, closing at least one file within the server, editing at least one file within the server, or searching at least one file within the server;

formatting at least one application output associated with the at least one selected application actions based on a profile of the wireless client device and a user selection of one or more fields associated with the at least one file; and

transmitting the formatted at least one application output to the wireless client device, wherein

the profile of the wireless client device includes a device type of the wireless client device.

22. (Previously Presented) The method of claim 21 wherein  
the selected application comprises at least one of an email application, a calendar application, a personal directory application, or a public directory application.

Claim 23 (Cancelled)

24. (Currently Amended) The method of claim 21<sub>1</sub> wherein  
the profile of the wireless client device includes ~~comprises one or both of~~ at least one feature of the wireless client device ~~or a device type of the wireless client device.~~

25. (Currently Amended) The method of claim 24<sub>1</sub> wherein  
~~the profile of the wireless client device comprises at least one feature of the wireless device, and wherein~~

the at least one feature of the wireless client device includes ~~comprises~~ one or both of an input interface feature ~~[[or]]~~ and a data processing feature.

26. (Previously Presented) The method of claim 21 wherein  
formatting the at least one application output comprises altering an object or artifact contained in the at least one application output separate from other information included in the at least one application output, the object or artifact being altered to reduce an amount of information that the object or artifact contains.

27. (Currently Amended) The method of claim [[24]] 21, wherein ~~the profile of the wireless client device comprises a device type, and wherein~~ the device type of the wireless client device includes ~~comprises~~ one or more of a data-capable wireless phone, an interactive pager, [[or]] and a personal digital assistant.

28. (Currently Amended) A wireless communication system, ~~the system~~ comprising:  
~~at least one~~ a server having one or more applications thereon; and  
~~at least one~~ a wireless client device comprising:  
    a views/folders module that enables the ~~at least one~~ wireless client device to display options associated with a selected application residing on the ~~at least one~~ server;  
    a default and custom actions module that enables the ~~at least one~~ wireless client device to select an ~~at least one~~ application action associated with the selected application to be executed on the ~~at least one~~ server, the application action comprising one or more of  
        opening at least one file within the server,  
        closing at least one file within the server,  
        editing at least one file within the server, [[or]] and  
        searching at least one file within the server; and  
    a forms module that enables the wireless client device to view at least one application output associated with the ~~at least one~~ selected application action, wherein the output is formatted based on a profile of the wireless client and a user selection, made on the ~~at least one~~ wireless client device, of one or more fields associated with the at least one file, and

the profile of the wireless client device includes a device type of the wireless client device.

29. (Currently Amended) The system of claim 28, further comprising  
a customization module that enables the ~~at least one~~ wireless client device to customize at  
least one view of the at least one application output.

30. (Currently Amended) The system of claim 29, wherein  
the customization module further enables the ~~at least one~~ wireless client device to  
customize at least one of a display language, a time zone, a date format, and a font format.

Claim 31 (Cancelled)

32. (Previously Presented) The system of claim 28, wherein  
the selected application comprises at least one of an email application, a calendar  
application, and a public directory application.

33. (Currently Amended) A wireless client device configured to communicate ~~capable~~  
~~of communicating~~ with at least one server having one or more applications thereon, ~~the wireless~~  
~~client device~~ comprising:

a views/folders module that enables the wireless client device to display options  
associated with a selected application residing on the at least one server;

a default and custom actions module that enables the wireless client device to select ~~an~~ ~~at least one~~ application action associated with the selected application to be executed on the at least one server, the application action comprising one or more of

opening at least one file within the server,

closing at least one file within the server,

editing at least one file within the server, ~~[[or]]~~ and

searching at least one file within the server; and

a forms module that enables the wireless client device to view at least one application output associated with the ~~at least one~~ selected application action, wherein

the output is formatted based on a profile of the wireless client and a user selection, made on the ~~at least one~~ wireless client device, of one or more fields associated with the at least one file, and

the profile of the wireless client device includes a device type of the wireless client device.

34. (Previously Presented) The wireless client device of claim 33 further comprising a customization module that enables the wireless client device to customize at least one view of the at least one application output.

35. (Previously Presented) The wireless client device of claim 34 wherein the customization module further enables the wireless client device to customize at least one of a display language, a time zone, a date format, and a font format.

Claim 36 (Cancelled)

37. (Previously Presented) The wireless device of claim 33 wherein the selected application comprises at least one of an email application, a calendar application, a personal directory application and a public directory application.

38. (Currently Amended) A storage medium having stored thereon ~~for storing a~~ machine readable code for enabling a wireless client device to communicate with at least one server having one or more applications residing thereon, the machine readable code being executable on the ~~to enable a~~ wireless client device to perform ~~communicate with at least one server, having one or more applications residing thereon, according to the steps of:~~

enabling the wireless client device to select an application residing on the at least one server;

enabling the wireless client device to select at least one application action associated with the selected application residing on the at least one server;

executing the at least one selected application action on the at least one server, the application action comprising one or more of opening at least one file within the server, closing at least one file within the server, editing at least one file within the server or searching at least one file within the server;

formatting at least one application output associated with the at least one selected application action based on a profile of the wireless client device and a user selection of one or more fields associated with the at least one file; and

transmitting the formatted at least one application output to the wireless client device,  
wherein

the profile of the wireless client device includes a device type of the wireless client device.

39. (Previously Presented) The storage medium of claim 38 wherein  
the selected application comprises at least one of an email application, a calendar application, or a public directory application.

Claim 40 (Cancelled)

41. (Currently Amended) The storage medium of claim 38, wherein  
the profile of the wireless client device includes ~~comprises one or both of~~ at least one  
feature of the wireless client device ~~or a device type of the wireless client device.~~

42. (Currently Amended) The storage medium of claim 41, wherein  
~~the profile of the wireless client device comprises at least one feature of the wireless client device, and wherein~~  
the at least one feature of the wireless client device includes ~~comprises~~ one or more of an  
input interface feature ~~[[or]]~~ and a data processing feature.

43. (Previously Presented) The storage medium of claim 38 wherein

formatting the at least one application output comprises altering object or artifact contained in the at least one application output separately from other information included in the at least one application output, the object or artifact being altered to reduce an amount of information that the object or artifact contains.

44. (Currently Amended) The storage medium of claim ~~[[41]]~~ 38, wherein ~~the profile of the wireless client device comprises a device type, and wherein~~ the device type of the wireless client device ~~includes~~ comprises at least one of a data-capable wireless phone, an interactive pager, and a personal digital assistant.
